

TCI America Environmental, Health, Safety, and Security Policy

TCI America is committed to protecting the environment, and the safety and health of its employees, and minimizing the impact of our operations on the communities where we work, by implementing an Environmental, Health, Safety, and Security Management System.

We are committed to compliance with all applicable federal, state, and local Environmental, Health, Safety, and Security (EHS&S) regulations and other related requirements in the receipt, manufacture, and distribution of chemical products.

This policy will be posted in the main office areas of the company's buildings and on the company website.

We are committed to training all of our employees regarding the importance of EHS&S protection and the role they play as stewards.

We are committed to continually reducing the impact of our operations on the environment and to preventing pollution through on-going improvement programs.

This policy will be reviewed annually by management in cooperation with stakeholders for areas of improvement in compliance with changing statutes.
